

Create fast and secure  
static websites and blogs with Jekyll

## HOW TO CREATE DEFAULT LAYOUT

with Jana Bergant

**HTML code  
from start  
to end of the header**

# YAML FRONT MATTER

It's a form of yams Jekyll uses to maintain data about a page and its content

# YAML FRONT MATTER

**MUST be  
at the beginning of the file!**

```
{% if page.title %}  
  {{ page.title }}  
{% else %}  
Great web agency  
{% endif %}
```

```
{% if page.title %}  
  {{ page.title }}  
{% else %}  
Great web agency  
{% endif %}
```

# Assignment

**Add custom title  
to header of every page**
